

Myth Busters and Frequently Asked Questions

SAP® Business All-in-One

SAP® Business All-in-One is a scaled down version of SAP R/3!

No, it is the same system, same version but with the difference that it is already pre-configured according to the Best Business Practices, which provide a sound foundation for pre-packaged, ready-to-use SAP® Business All-in-One solutions.

SAP® Business All-in-One is only for the Big Guys!

What is True, is that SAP is known as the “gold standard” for ERP and 70% of the world’s Fortune 500 companies run on SAP®. However, it’s also true that SAP® has products and services just for companies like yours. SAP® Business All-in-One Packages are affordable and scalable solutions. Across all industries, SAP® has more than 33,500 SAP ERP installations at companies of your size.

SAP takes too long to implement!

For companies like yours SAP® implementations can take only weeks or months. Most qualified SAP® Business All-in-One partner solutions take a few months to implement. SCT’s Qualified SAP® Business Solutions can be implemented within 3-4 months. These are Industry specific packaged solutions and are offered as fixed scope/fixed price projects.

I cannot justify the investment!

Companies like yours can take advantage of our pre-configured Business scenarios. Our packages feature metrics-based pricing: the cost of the solution is tied to the business value gained. Companies of your size with the same basic requirements find SAP® can pay for itself within a few months.

SAP is far too expensive!

Prices of ERP projects are tied to scope. Organizational complexities can lengthen deployment time increasing price. However, you can get the functions you need from our SAP® Business All-in-One industry packaged solutions with a defined scope, fixed price, and fixed timeline. You therefore only pay for what you need.

Does SAP offer a financing option?

Yes, SAP® Financing gives you a fixed interest rate and covers internal and external project costs for up to seven years. The hardware, software and even the implementation costs could be financed.

Upgrades are not included in the SAP Maintenance offering!

Upgrades are a standard part of the maintenance fee of the currently licensed products.

- Unlike other providers, SAP® Business All-in-One is our sole focus.
- SCT is a qualified, SAP® -Certified Business Partner and we are devoted to your industry.
